AI - Term Project Brief

Proposal Submission

The first milestone in completing the project is to prepare and submit proposal presentation consisting of a maximum of 6 slides, outlining the following:

Team Members (3) (on the cover page)
Project topic
Statement of project objectives
Approach (i.e., what tools and techniques you intend to use to achieve the project objectives)
Deliverables (i.e., a list of items that will be submitted upon completion, and their relevance to the stated objectives)
Evaluation methodology (i.e., how can I check to see whether you have achieved the objectives or not.)

Video Demo and Presentation

The second milestone is to record a short (< 15 minutes) demonstration of your work (i.e., running code and slides) to present your completed project to your peers. This video must be uploaded. Please submit a link of the video.

Final Submission

The third and final milestone is to upload your completed project (incl. code and slides) to a Github Repository, along with a user documentation manual as a .MD file that describes the project and usage instructions to other interested students and researchers.
